

**For Immediate Release**

**MedX Health Signs Master Distributor Agreement with  
Medical Marketing Berlin GmbH (MMB)**

*MedX with new partner to present at Medica  
November 18-21, Dusseldorf, Germany*

**CANADA - Mississauga, Ontario – October 28, 2009 – MedX Health Corp., (TSXV.MDX)** a global leader in developing drug free, non-invasive, low level laser and light therapy for tissue repair and pain relief, today announced that the company will be expanding its sales and marketing efforts with the new European master distributor MMB GmbH.

Earlier in 2009 MedX Health had announced the establishment of its first European Distribution Center in the Netherlands. The new partner company MMB (Medical Marketing Berlin GmbH) is located in the capital of the biggest European health care market (Germany) and focused on marketing and sales of the MedX Health Laser therapy products. Frank Raymakers, head of the MedX Health Distribution Center in the Netherlands, is the new European Sales Director at MMB GmbH. In the last several weeks he has successfully introduced the MedX Health Laser therapy products to various distributors in Europe.

The MMB GmbH is focused on serving the sales and marketing needs of North American health care companies and their market entry to Europe. The President, Mr. Andy Roesch, started his first medical device company in 1990 and introduced diverse medical products from North America in Germany and Europe. In the year 2000 his Roesch AG introduced to Europe the needle and pain free injection device, called Injex and later took the company with huge success onto the Frankfurt Stock Exchange.

“We completed extensive due diligence and market studies on the MedX Health product technology. We see excellent market opportunities in Europe and we are excited to present for the first time with MedX Health at the MEDICA 2009 in Dusseldorf in Germany” stated Andy Roesch.

“We made a strong commitment to globalize our laser and light products, and we are well on our way with our new partner in Berlin, obtaining CE Mark for all laser and light products, and rapidly expanding our worldwide network of new distributors,” states Steve Guillen, President and CEO of MedX Health.

**About MedX**

MedX Health is a global leader in the design, manufacturing and distribution of quality low level laser and light therapy technology for use in numerous medical settings that provide patients with non-invasive, drug-free solutions for improving clinical outcomes. MedX’s innovative Laser/Light Therapy devices enhance the patient’s quality of life and improve the standard of care for tissue repair and pain relief.

MedX is expanding its distribution network and marketing programs globally through strategic partnerships, while continuing to develop and acquire new dental, rehabilitation and wound care products. In particular, MedX plans to accelerate the development of a new product aimed at the rapidly-growing wound care market. Recently, MedX announced a new patent allowance for bone growth that will join several key existing patents, including “Photobandage” a new technology that allows a wound to be bathed in light and is designed to enhance the healing process. The Company intends to license its proprietary wound care technologies to one or more major wound care companies for further development, marketing and commercialization.
